

I can identify regular and irregular shapes.

Usually, Y5 warm up with a Mini Maths activity each day. We would like you to continue this routine.

Friday

Remember, regular shapes have sides that are all equal and angles that are all equal.

Identifying Regular and Irregular 2D Shapes	Back to Basics
<p>Lisa says:</p> <div style="border: 2px solid red; border-radius: 15px; padding: 10px; display: inline-block;"><p>An equilateral triangle is a REGULAR shape.</p></div> <p>Is Lisa correct: YES or NO?</p> <p>Explain your answer.</p>	<p>2.) $\frac{3275}{7} =$</p> <p>3.) $5,488 \times 6 =$</p> <p>4.) $4,388 + 2,886 =$</p> <p>5.) $5,400 - 987 =$</p>

Answers below - once you have tackled the six questions!
