

Create a poster for one of the mathematical words we have looked at this week:

multiples, factors, prime numbers, square numbers or cube numbers.

You could include

- examples of the number
- how to identify or find them
- a written explanation of the word or phrase
- labelled diagrams
- pictures to demonstrate how these numbers might be grouped

Look back at the links from this week to help you.

We look forward to seeing your colourful and informative designs.

Have a go at this online game. Which lands can you explore this week?
