

Red squirrels are very fast and very good at climbing trees.

They have red fur and a long tail.

They live high up in trees in woods.

Squirrels build a nest of leaves and twigs, called a drey.

Baby squirrels are called kittens.

When they are born they feed off their mother's milk.

They eat seeds, nuts, pine cones and fruit.

They store food in holes in the ground for the winter.

There are not many red squirrels left in England.

Name:

Fill in the missing words:

1. Red squirrels are very good at climbing
