

Friday 5th Feb

You've very nearly nailed yet another week of super home learning/teaching! You are doing brilliantly - children and adults! Today we are really thinking about taking time for some fun - lets concentrate on a feel-good-Friday! Remember it's no screens from after the assembly at 11.25 -so use the time to get creative, physical and make sure you have quality time together!

Mr Dyer's Assembly - see My Ed for link

Maths - Today as it's Friday and you've worked your socks off this week, I've found some super fun games to test your multiplication knowledge.

<https://mathsframe.co.uk/en/resources/category/7/multiplication-and-division>

Scroll through the free games and for each make sure you select practice for multiplication (2,5,10)

I tried 'Mini Maths Motors', 'Maths Race Multiplication', 'Super Bowling' - get exploring (you will probably want to turn the rather irritating music/sound effects right down!!)

Have fun!

English/ reading comprehension : Listen to David Walliam's story -

The Queen's Orangutan <https://www.youtube.com/watch?v=HtKldKp3x-o> ... and if you would like to look at the text and challenge Q's on the website!

Art: Today is the day we can finally make our boats! Follow your design closely and don't forget to take photographs as you do at different stages. It is important that the children themselves take the photographs, as this will help them within the Computing Unit also. Please do send us their photographs-we would love to see them! Happy sailing everyone!

PE : With Mrs C - Finishing off the unit on football -see powerpoint on website. Below is the link included on the last slide

"ONE NICE THING ABOUT HOME SCHOOLING IS
YOU NEVER GET A TEACHER YOU DON'T LIKE."

*Please remember you are doing a fantastic job,
so have a well-deserved weekend off and then
remember on Monday.....*
