

Art-Lesson 3

Today I would like you to design your boat. You will begin by thinking about which materials would be best at floating on water. Make a list of the materials you will need under the heading Materials. Remember to include the materials you will need to decorate your boat also.

Next I would like you to consider what your boat will look like. I have included some pictures to help you with this. Draw a detailed picture of what your boat will look like and label it with the different materials you plan to use. Remember to include details such as colours and how it will be decorated.

Ask your adult to save any recycling objects this week so that you are ready to make your boat next week (this might include plastic bottles or tubs, lids, boxes, loo roll holders etc).

When you have completed your drawing, I would like YOU to take a photo of your own work, using an I-Pad or a mobile device (ask your adult first please). This is a skill we cover in Computing and will be linking with this Art unit of work. The idea is that you document your progress with photos and videos, and at the end of the unit, you will evaluate your work in a video!

Here are some examples:
