LO: I can apply the 'adjusting strategy' when adding 3-digits (1.19~2.4)

original question: 230 + 390 =

adjusted question: 230 + 400 = 630 (+10)

workings out: 630 - 10 = 620

LO: I can apply the 'adjusting strategy' when adding 3-digits (1.19~2.4)

original question: 130 + 480 =

adjusted question: 130 + 500 = 630 (+20)

workings out: 630 - 20 = 610
