

LO: I can confidently apply the adjusting strategy (2.1-2.2)

Please use the steps to success. Replay my examples from yesterday's lesson

$1. 11 + 29$

$2. 12 + 19$

$3. 16 + 39$

$4. 38 + 27$

$5. 43 + 28$

$6. 19 + 37$

$7. 46 + 45$

$8. 28 + 55$

$9. 67 + 26$

#Can you write your steps to success for this problem? You may also work out the answer too but it is really important we see you steps first!

$31 + 62 =$
