

Week 3 - Day 5

Subtracting two 2-digit numbers which do not cross the tens

e.g. $38 - 17 =$

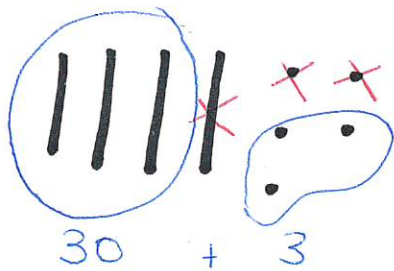

not $35 - 18 =$

Task: Give children two 2-digit numbers to subtract using dienes.
Children have been using dienes in maths so should be really familiar with them. The children can draw them using lines to represent tens and dots to represent ones.

$$| = 10 \quad \bullet = 1$$

Examples:

$$45 - 12 = 33$$

$$57 - 33 = 24$$
