*20 minutes of Reading for Pleasure

Maths- L.O. To solve word problems using the area model for multiplication

This is a progression from yesterday and a chance to put the method into practice with some word problems. The word problems can be found below.

If you need the video link again, here it is

<https://vimeo.com/458471421>

L.O. To solve word problems using the area model for multiplication

- 1) Alisha went on a shopping spree and bought 12 pairs of shoes. Each pair cost £15. How much did she spend?
- 2) If Jimmy does 13 press ups a day, how many would he have done after 34 days?
- 3) Mr Dyer wants to replace the school's footballs. Each football costs £14 and he wants to order 85. How much will they cost?
- 4) Emma buys a jar full of 91 sweets. She wants to get enough sweets to last her all year, so she buys another 11 jars. How many sweets are there in all 12 jars?
- 5) Brandon goes to watch the football 17 times in a month. How many times does he watch the football over 12 months?
- 6) Mr Pattison chooses 15 people to play in a rugby team. He decides to put together 12 teams throughout the school. How many players does he have altogether?
- 7) Lewis takes a train to London. Each train carriage can carry 68 passengers. The train has 14 carriages. What is the total number of passengers that the train can carry?

**TT Rockstars- play for 15 minutes each day.*

RE - Creation Story

One the website there are two activities for you to complete.
