

Year 3

Spring Term Guide

Some of the things I will be learning this term:

Punctuating speech with inverted commas.

Using the column method for addition and subtraction.

Identifying and explaining rock types.

Finding out about the life of Mary Anning and her role in fossil hunting.

Investigating the properties of light.

Collecting data and creating polls.

Exploring the concept of pre-history through timelines and fossils.

Exploring Islam and Judaism through festivals.

Applying techniques for additive and carving structures in clay.

Exploring travel over, under, through and across different equipment in Gym.

Refining performances in Dance through the Haka.

Singing in a group to Three Little Birds and exploring our responses to music.

Counting up to 10 and building sentences in French.

Exploring dreams and goals followed by discussing health and fitness in PSHE.

You could help me with my learning by:

Reading daily at home and recording this in the green reading record.

Practising time tables (2,5,10,3 and 6) as well as the related division facts.

Continued practise of number bonds within ten. These will be invaluable when tackling the column method.

Continue to practise the spellings sent out in the weekly homework.

We are really excited about:

Gathering information about the Jurassic coast and its location.

Developing teamwork in Tag Rugby and handball, taking part in some games against each other!

Designing and making a fabric product using joining techniques (sewing).
