LO: to list and classify sources of light.

Please send today's science work to the class email address!

6NH@brixington.devon.sch.uk

6OH@brixington.devon.sch.uk

Watch the following Loom video from Mr Hubbard:

<https://www.loom.com/share/ceb9eb38f644489991fc40e629864964>

Create a poster of ten things that are light sources (things that give or reflect light). If you're stuck, think about things in your home...

Pupils experiment:

Stand in front of a mirror (with the lights on and close your eyes for 10 seconds. Open your eyes and look at your pupils (the black spots in the middle of your eyes). What happens straight after your eyes are opened?

Success criteria:

\*include 10 sources of light

\*draw and label your diagrams (or use a computer)

\*state whether they give light (e.g. a lamp) or reflect light (e.g. the Moon)

\*state whether the light source is natural (e.g. a firefly) or human made (e.g. a lightbulb).
